

**NFRMPO Air Quality Significant Project Definition for Conformity as of 6/6/2019:**

- Adding at least two (2) lane miles, or completes a regional connection;
- Adding a new intersection on principal arterials or above;
- Adding new interchanges or grade separated intersections;
- Major improvements to existing interchanges excluding drainage improvements and ramp widening;
- Regional transit projects between jurisdictions;
- Regional transit projects on fixed guideways that offer a significant alternative to regional highway travel;
- Addition or deletion of major bus routes with 3,000 transit patrons per day, taking into account existing service levels.
